

EDUCATION

Imperial College London	United Kingdom
Master of Engineering, Chemical Engineering	2019 – 2023
- Upper Second-Class Honours - Modules in Corporate Finance (78.6%) and Particle Engineering (79.0%)	
Christ's Hospital School	2016 – 2018
- A Levels: Chemistry, Mathematics, Biology (3A*s) - GCSEs: 6A*s, 4As, including Mathematics (A*), English Language (A)	

WORK EXPERIENCE

Hometrack	London, United Kingdom
Data Engineer	April 2026 – Present
- Contributing to an active SQL Server-to-Databricks migration, re-platforming legacy pipelines and datasets onto Databricks across Azure and AWS. - Write and optimise SQL and PySpark transformations to ingest, clean, and validate large-scale property datasets, ensuring data quality for downstream reporting. - Resolved data-quality tickets and expanded unit test coverage for pipeline transformations, catching issues before they reached production. - Supported AWS credential security hardening, including KMS key rotation and GitHub repository security controls, reducing exposure risk across data infrastructure. - Monitored performance KPIs, including response times, for an API hosted on Azure Container Apps to support reliability. - Authored SOPs documenting build and maintenance processes to support handover and operational continuity.	
SpecFin Capital	London, United Kingdom
Financial Data Analyst	July 2024 – April 2026
- Queried and analysed large-scale UK mortgage loan datasets using SQL to support underwriting and credit risk assessment, feeding data-driven insights into financing decisions. - Applied SQL and Python analysis to structured loan-level data, contributing to a 30% reduction in financing costs through improved credit insights. - Built and automated Python Extract, Transform, Load (ETL) workflows to ingest, clean, and transform macroeconomic and portfolio data on a weekly cadence, reducing manual reporting effort. - Designed and maintained Tableau dashboards to track portfolio KPIs (origination volumes, loss rates), turning raw loan-level data into reliable, stakeholder-ready reporting. - Implemented data cleaning and validation routines across large datasets in SQL and Python, improving data quality and consistency for downstream analysis.	
PGIM Fixed Income	London, United Kingdom
Summer Research Analyst	July – October 2022
Contributed to 3 debt/capital markets deals, including a £300m Term Loan and \$300m Sustainability-Linked Bond, presenting analysis on a £745m infrastructure sale to senior analysts and portfolio managers.	
University College London / BASF	London, United Kingdom
Data Analyst	June – September 2017
Supported PhD research on nanoparticle catalysts, collecting, cleaning, and analysing experimental data using Python and Excel.	
Skills	
Analytics & Tools – Microsoft Excel (VBA), SQL, Python, Pyspark, Databricks, Tableau/Power BI. Business & Product – Financial modelling, project management, Client-facing reporting, KPI tracking. Certifications – Databricks Certified Data Engineer Associate.
